## REPORT OF DIRECTOR AND SCHOOL IMPROVEMENT COUNCIL

The 2009-2010 School Year was another very successful year for the stakeholders of Floyd D. Johnson Technology Center despite the major budget shortfalls and cuts issued from the state of South Carolina. Students, faculty/staff, parents, business partners, and community members are all commended for doing more with less funding.

Floyd D. Johnson Technology Center earned an excellent absolute rating on the annual state report card for the 8th consecutive year. This is due to all stakeholders understanding and implementing sound Career and Technical Education Program Standards aligned with SREB's "High Schools That Work" key practices along with analyzing program data and adjusting instructional practices accordingly. For instance, our data showed that our students needed more opportunities to earn Dual Enrollment, industry credentials, work-based learning experiences, and competitive events at the district, state, and national levels. We responded by certifying all programs of study, which helped 149 students earn dual credit with York Technical College and 48 students earn an industry credential. Our largest jump occurred with work-based learning experiences, where 558 students participated in some type of extended learning opportunity, resulting in 767 experiences recorded. Career and Technology Student Organizations sent 78 students to competitive events, with 39 of those students placing within the top three in the state.

We are all extremely proud of the new Floyd D. Johnson Technology Center, which is scheduled to open for the 2010-2011 school year. We will be transitioning into the new building in July of 2010 and will welcome our first group of students into the new facility on August 18, 2010.
